JBIS

Journal of the British Interplanetary Society

VOLUME 48 **1995**

INDEX

EDITORS	*THEMES*
H. Benaroya	Lunar Structures
H. Benaroya	Lunar-Based Astronomy
L.J. Carter	General Issue
J. Auburn	Science Systems in Space (Part II)
F.I. Ordway III and F. Winter	Pioneering Rocketry & Spaceflight (Part V)
S. Mara	Cray Systems in Space (Part IV)
R.M. Zubrin	Mars Exploration (Parts I, II & III)
M.J. Fogg	Terraforming (Part V)
S. Santoli	Exobiology (Part IV)
D.G. Fearn	Electric Propulsion (Part I)

AUTHOR INDEX

Allen G.A.	An Interplanetary Transportation System for Delivering Large Groups of People to Mars	373
Banyard M.	Accessing Space Data on the Information Super Highway	275
Baud T.L.P.	Real-Time Simulation of the SAX Spacecraft AOCS	261
Baydal G.M. *et al*	Lunar Base Infrastructure and Lunar Resources (Lunar Cargo Shuttle Using Lunar Propellant)	21
Benaroya H.	Reliability of Telescopes for the Lunar Surface	99
Burkhalter B.B. & Sharpe M.R.	Lunar Roving Vehicle: Historical Origins, Development and Deployment	199
Burnham D.L.	Mobile Explorers and Beasts of Burden: A History of NASA's Prospector and Lunar Logistics Vehicle Projects	213
Bruckner A.P., Thill B., Anderson S., Pasco D. & Willman C.	Mars in situ Propellant Technology Demonstrator Mission	337
Chan K.	The Ulysses Flight Dynamics Software System	183
Chappell D.T.	Mars Subsurface Radar Mapper	395
Cockell C.S.	The Polar Exploration of Mars	355
Corkill R.W.	Cluster Mission Control System (CMCS)	249
Dolman K.	The RADARSAT Satellite Simulator: Advances in Satellite Simulation	177
Elrod M.	Considerations of a Habitat Design	39
Evans H.D.R. & Daly E.J.	Anisotropies in the Low Altitude Radiation Environment	149
Fairclough J.	Applying the ESA Software Engineering Standards to Small Projects	255
Fogg M.J.	Exploration of the Future Habitability of Mars	301
Fogg M.J.	Terraforming Mars: Conceptual Solutions to the Problem of Plant Growth in Low Concentrations of Oxygen	427
Foing B.H.	Astronomy and Space Science from Station Moon	67
Foing B.H.	Highlights from the COSPAR 1992 Symposium: "Astronomy and Space Science from the Moon"	71
French J.R.	Concepts for In-situ Resource Utilisation on Mars: A Historical Perspective	311
Giorgini J. *et al*	Magellan Aerobrake Navigation	111
Hansson P.A.	Exobiology, SETI, von Neumann and Geometric Phase Control	479
Harris R. & Ashton M.	The Envisat-1 Ground Segment	139
Heidmann J.	SETI Programmes all over the World (and further out)	447
Hilchey J. D. & Nein M.E.	Lunar-based Optical Telescopes: Planning the Astronomical Tools of the Twenty-first Century	77
Hiscox J.A. & Thomas D.J.	Genetic Modification and Selection of Microorganisms for Growth on Mars	419
Howard P.	SCOS-II Development	163
Johnson S.W., Chua K.M. & Carrier III W.D.	Lunar Soil Mechanics	43
Johnson S.W., Chua K.M. & Burns J.O.	Lunar Dust, Lunar Observatories and Other Operations on the Moon	87
Kerridge D.	New Technologies for Supporting Real-Time On-board Software Development	152
Kozlov I. A. & Shevchenko V.V.	Mobile Lunar Base Project	49
Klim R.	Automated Commanding for EUMETSAT	159
Landis G.A.	Footsteps to Mars: an Incremental Approach to Mars Exploration	367
Latham P.M. *et al*	The UK-25 Ion Thruster	501
Lowman Jr P.D.	Candidate Site for a Robotic Lunar Observatory: The Central Peak of Riccioli Crater	83
Maccone C.	Interstellar Travel Through Magnetic Wormholes	453
McMahon D. & Lecouat F.	Architectural Concept for Spacecraft Operations Automation	265
MacNiven D.	Environmental Ethics and Planetary Engineering	441
Malik A.K.	Plasma Instability Problems in Various Electric Propulsion Engines	507
Martin A.R.	Nuclear Electric Propulsion of Spacecraft	517
Matsumoto S. *et al*	Lunar Base System Design	11
Mautner M.N.	Directed Panspermia. 2.Technological Advances Towards Seeding Other Solar Systems and the Foundation of Panbiotic Ethics	435
Mitchell D.R. & Stauffer L.A.	A Multi-Attribute Utility Analysis on the Location of an Earth-based Analog for Habitation on Planetary Bodies	459
Mole R.A.	Terraforming Mars with Four War-surplus Bombs	321
Nein M.E. & Hilchey J.D.	The Lunar Ultraviolet Telescope Experiment (LUTE): Enabling Technology for an Early Lunar Surface Payload	93
Norris P.	Navigating to Tranquility Base: A 25th Anniversary Retrospective	229

Nussinov M.D. & Santoli S.	Epistemology of a Paradox - Discussing ETI Through the Evolutionary Impulse Paradigm: We are Not Alone, but Few and Far Between	475
Parisi J.	Controlling Laser Chaos	465
Peat C.	MMORBIT - A PC Based Mission Display Program	279
Plumb K. & Gawthorpe D.	Advances at the UK Earth Observation Data Centre	169
Saccoccia G.	European Electric Propulsion Activities in the Era of Application	487
Sadeh W.Z. & Criswell M.E.	Inflatable Structures for a Lunar Base	33
Sellers J.J., Meerman M., Paul M. & Sweeting M.	A Low-Cost Propulsion Option for Small Satellites	129
Shafirovich E.Ya. & Goldschleger U.I.	Mars Multi-Sample Return Mission	315
Shevchenko V.V.	Manned Lunar Base Site Selection	15
Sims M.R. & Mills A.A.	Measurement of the pH of the Martian Surface	391
Sloggett D.R.	Perspectives on the Infrastructure Required to Routinely Exploit Earth Observation Data for Monitoring European Coastal Waters	239
Smietana R.	The Future of Hybrid Simulation	271
Stroup T.L.	Lunar Bases of the 20th Century: What Might Have Been	3
Sved J., Kulcinski G.L. & Miley G.H.	A Commercial Lunar Helium 3 Fusion Power Infrastructure	55
Thomas D.J.	Biological Aspects of the Ecopoesis and Terraformation of Mars: Current Perspectives and Research	415
Tranquille C.	The Ulysses Data System	145
Twynam D. & Williams P.	The ORATOS Support Layer	189
Walker S.T., Alexander R.A. & Tucker S.P.	Thermal Control on the Lunar Surface	27
Williams J.D., Coons S.C. & Bruckner A.P.	Design of a Water Vapor Adsorption Reactor for Martian in situ Resource Utilisation	347
Winter F.H.	Friedrich Schmiedl (1902-1994): The Passing of Another Pioneer	235
Zubrin R.M.	The Hypersonic Skyhook	123
Zubrin R.M.& Weaver D.B.	Practical Methods for Near-Term Human Exploration of Mars	287
Zubrin R.M., Price S., Mason L. & Clark L.	Report on the Construction and Operation of a Mars in situ Propellant Production Unit	327
Zubrin R.M.	Diborane/CO_2 Rockets for Use in Mars Ascent Vehicles	387
Zubrin R.M.	The Economic Viability of Mars Colonization	407
Zubrin R.M.	The Use of Currently Unknown Near-Solar Stellar Objects in Facilitating Interstellar Missions	467

SUBJECT INDEX

Aerobraking	111	Evolution	475, 479	Lasers	465
Antarctica	459	Exobiology	445 *et seq*	Lunar Bases	3 *et seq*
Apollo 11 Navigation	229	Extraterrestrial Life	475, 479	Concept History	3
Apollo LRV	199	Fermi Paradox	475	Dust Problem	87
Astronomy, Lunar Based	67 *et seq*	Fusion Power	55	Habitat Design	39
Biology of Terraforming	415	Genetic Engineering	419	Infrastructure	21, 55
Cluster, Mission Control	249	Ground Segment, ATOS	265	Inflatable Structures	33
Simulation	271	Cluster	249	Mobile	49
Correspondence	236, 444	Envisat-1	139	Power Supply	55
COSPAR Symposium,		EUMETSAT	159	Science	67, 71
Lunar Science	71	ORATOS	189	Site Selection	15
Diborane/CO_2 Rocket	387	SCOS-II	163,265	Soil Mechanics	43
Earth Observation Data Centre	169	Ulysses Data System	145,183	System Design	11
Earth Observation Infrastructure	239	Helium 3, Lunar	55	Thermal Control	27
Electric Propulsion, Europe	487	Information Super Highway	275	Use for Astronomy	67 *et seq*
Nuclear Powered	517	Infrastructure, Lunar Base	21, 55	Lunar Dust	87
Plasma Instability	507	Mars Transportation	373	Lunar Logistics Vehicle	213
UK-25 Thruster	501	Skyhook	123	Lunar Roving Vehicle	199
Envisat-1	139	Interstellar Communication	465	LUTE Lunar Telescope	77, 93
EUMETSAT	159	Interstellar Travel,		Magellan	111
Ethics, Panspermia	435	Compact Objects	467	Mars, Diborane/CO_2 Rocket	387
Terraforming	441	Wormholes	453	Economics of Colonisation	407
European Coastal Waters	239	ISO Simulation	271	Exploration Strategy	367
